

*This is an English translation of a personal letter sent to some participants as part of the project Testing Denmark*

**Dear participant,**

We are writing in reference to the antibody test you ordered, since we haven't received your test results yet.

Your reply is of great value to us, even if you performed the antibody test days ago or if for some reason the antibody test failed. If the antibody test has passed its expiration date, we cannot guarantee that the results are accurate. However, you are welcome to perform the antibody test past its expiration date and register the test result in the questionnaire. If you chose to perform the test past its expiration date, we kindly ask you to cite the day you performed the antibody test.

We hope that you register your results as soon as possible, and no later than October 27<sup>th</sup> 2020.

**You submit the test results via an electronic questionnaire.**

**You enter the questionnaire by use of the personalized link, which is present in your personal letter, sent to your e-Boks.**

If the link fails, you can visit the following website: <https://surveys.analyzer.com>. Here you may log in with the survey ID and password which can also be found the pdf-letter we have sent you.

More information on how SSI processes personal information is found in the original invitation letter received on e-Boks. More information about the project is available at [www.vitesterdanmark.dk](http://www.vitesterdanmark.dk), where you can also watch an instruction video on how to perform the antibody test.

If you have any questions, please contact our call-center on 70 80 39 47. It is open Monday-Thursday 16-21 and Saturday-Sunday 10-15. The call-center closes permanently on October 26<sup>th</sup>. You can also send us an email: [kontakt@vitesterdanmark.dk](mailto:kontakt@vitesterdanmark.dk)

Thank you for your time and effort. And thank you for your participation!

Yours sincerely,

Statens Serum Institut and **VI TESTER DANMARK**
